

SOUTH AFRICAN DESIGNED TECHNOLOGY AND OPERATION TO MEET ALL YOUR TYRE RECYCLING AND CRUMBED RUBBER SUPPLY NEEDS.

"We are proud to be part of the initiative towards solving the waste tyre problem in South Africa, by applying world class process development strategies and implementation of best practice for waste tyre recycling, in order to mitigate environmental concerns related to the mismanagement of this type of waste."

Our company was established with waste hierarchical principles which promote the movement of waste up the waste hierarchy.

- ✓ Disposal techniques such as landfill are not practical as the elasticity and large volume that is taken up by tyres, makes them "un-compactable friendly".
- ✓ Why dispose? If you can recycle into a reusable product!

LEGISLATIVE COMPLIANCE

Energia complies with:
 National Environmental Management: Waste Act (2008)
 Waste Tyre Regulations of 2009

QUALITY PRODUCTS

Our shredded and granulated rubber products range from tyre chips 50 mm to crumb and ultrafine products from 7mm down to 250 micron. Products are free of steel and nylon fibre impurities. Energia rubber tech (Pty) Ltd primarily produces the following products:

- ✓ Rubber crumb complying with COLTO and TG1 specifications for asphalt industry
- ✓ Rubber granules range: 7mm, 4mm & 2mm for rubber matting, athletic tracks, children's playgrounds, flooring and other industrial applications.
- ✓ Rubber powder range: 40 mesh, 50 mesh, & 60 mesh for specialized applications.

THE COMPANY THAT PROVIDES AN ENVIRONMENTALLY SOUND SOLUTION TO WASTE TYRE RECYCLING.

Energia Rubber Tech (Pty) Ltd was founded in 2010 and since its inception has become the supplier of choice to our clients. Energia's manifesto for growth commits us to the understanding that with incremental business growth comes increased responsibility. It is therefore part of our company's directive to educate and inform both the waste tyre generator and rubber crumb user of their role and valued contribution towards realizing a properly maintained solution to the national waste tyre issue in South Africa.

"RECYCLE TODAY FOR A BETTER FUTURE TOMORROW"
